

Project Title: Deceiver's Dice

Group Name: The Bots

Phase 3 Report

Below is a summary of what we achieved in Phase 3, grouped by individual contribution.

Jeremy

- Developed the backend API
 - User statistics page
 - Communicating the logic of the game from the backend to frontend
 - Implemented user authentication
- Trained the bot player agents
- Deployed the application

Long

- Developed the lobby screen
- Developed the Game Screen (in particular, the text around the visuals)
- The communication from the backend to the frontend (wrote socket code on the frontend that allowed Ben to get information from the backend)
- Produced the promotional video

Nate

- Wrote code for logical implementation of Liar's Dice game
- Wrote a simple bot to assist with the training of Jeremy's bots
- Tested logical implementation of liar's dice
- Tested functionality of webapp

Ben:

- Did most of the graphic design for the webapp
- Built the Game Component (the center part of the game with icons)
